Godaam

Everything you need to run a godown, in one app.

Every feature in detail: stock in and out, gate passes, stock receipts, rent and invoices, payments, reports and full control over your team, in English and हिंदी.

Android and iPhone | Android tablets and iPad | Windows computer | English · हिंदी

30-day free trial

WHAT GODAAM DOES

One app for the godown and the office

Godown staff work on their phones. The owner and the accountant work on a phone, a tablet or a Windows computer. Everyone sees the same stock, and each person sees only what their role allows.

p.3

Receive stock

A numbered lot for every arrival, with bags, weight, location, vehicle and charges.

p.4

Stock receipts

A printed, numbered receipt for every lot, with your rates, insurance and terms, versions and duplicate marking.

p.5

Dispatch and gate pass

Part or whole lots, a numbered gate pass, and your approval for staff dispatches.

p.6

Move and find stock

Shift lots between sheds, and find any lot by party, number, mark or QR code.

p.7

Hold and corrections

Hold stock pledged for a loan, and cancel a wrong entry with a full trail.

p.8

Fumigation

When each lot is next due, phone reminders, stock under cover held, and a register for inspectors.

p.9

Parties and rates

Monthly, weekly or daily rent, insurance, and godown or custom rates per party.

p.10

Invoices

Rent worked out at dispatch, on your letterhead with a UPI QR code.

p.11

Payments and statements

Cash, UPI, bank or cheque, with balances, advances and statements of account.

p.12

Dashboard, expenses and reports

Money and stock at a glance, bills and salaries, profit or loss, and seven reports with Excel export.

p.13

Team and control

You approve every device and pick each person's role. Every action is in the audit log.

p.14

English and हिंदी, easy start

Every screen and document in either language. Your godown, parties and stock from one Excel workbook.

RECEIVE STOCK

Every arrival becomes a numbered lot

Staff pick the party, choose the commodity and enter the goods. Godaam numbers each lot by year, and lot numbers are never reused.

1 Party

Search by name or mobile, or tap a recent party.

2 Goods

Commodity (the party's usual one is already selected), bags, weight in quintal or kg, brand or mark, declared market value, unloading charges as a rate or a total, storage location, vehicle number and notes.

3 Check and save

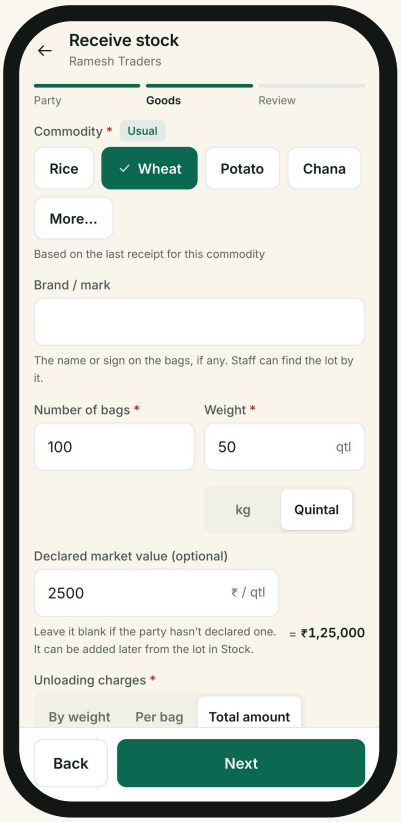

A review screen before saving. A value far from the usual one for that commodity gets a warning.

Intake note on WhatsApp

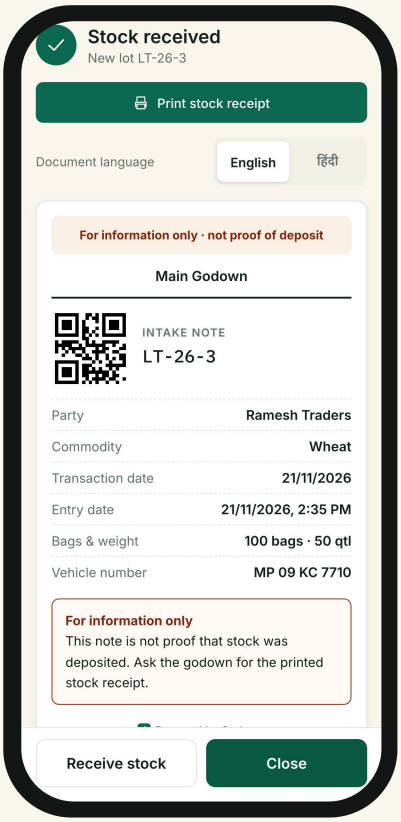

Send the party a quick note of what came in, in English or Hindi. It's for information only, and it is clearly marked as not proof of deposit.

Print the stock receipt

The proper receipt is printed from the same screen (see the next page).

Entering the goods

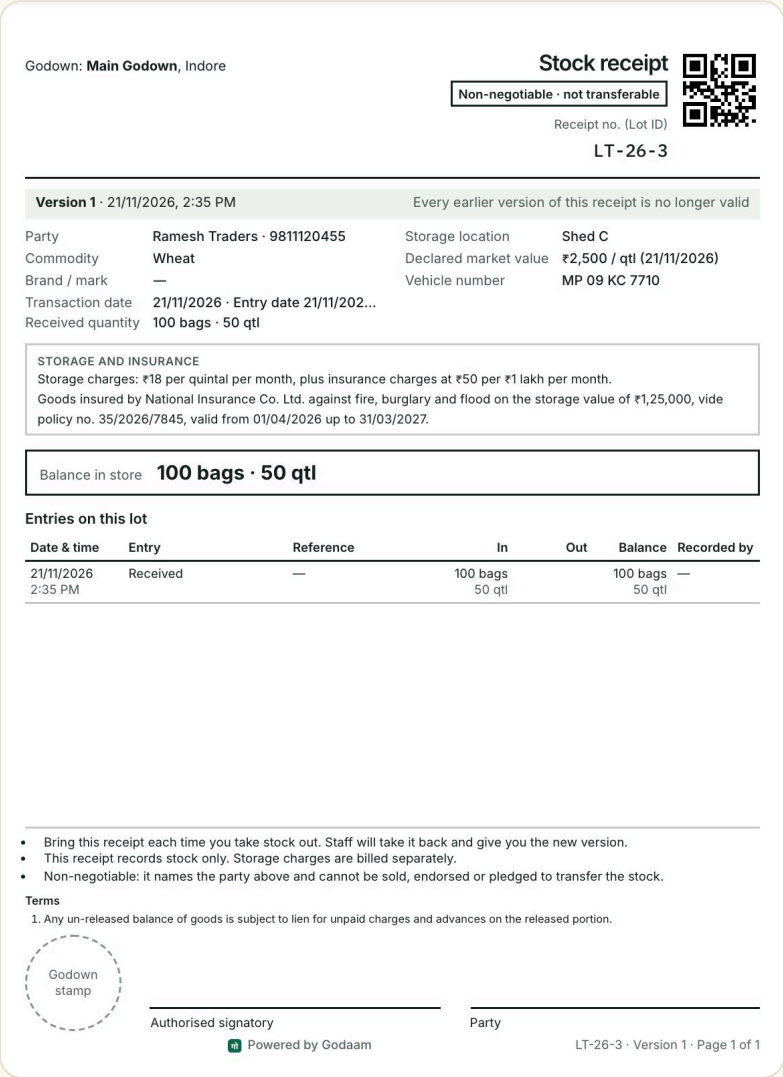

Saved: print the receipt or share the intake note

Owners and accountants can receive stock from their own phone, tablet or computer too, so a small godown doesn't need separate staff.

THE STOCK RECEIPT

A receipt your parties can trust

Each lot has one printed stock receipt on A4 or Letter. It shows the lot as it is now and every entry on it: received, each dispatch with its gate pass number, holds, and anything cancelled. It prints in English.

Godown: **Main Godown**, Indore

Stock receipt

Non-negotiable · not transferable

Receipt no. (Lot ID)

LT-26-3

Version 1 · 21/11/2026, 2:35 PM — Every earlier version of this receipt is no longer valid

Party	Ramesh Traders · 9811120455	Storage location	Shed C
Commodity	Wheat	Declared market value	₹2,500 / qtl (21/11/2026)
Brand / mark	—	Vehicle number	MP 09 KC 7710
Transaction date	21/11/2026 · Entry date 21/11/202...		
Received quantity	100 bags · 50 qtl		

STORAGE AND INSURANCE

Storage charges: ₹18 per quintal per month, plus insurance charges at ₹50 per ₹1 lakh per month.
Goods insured by National Insurance Co. Ltd. against fire, burglary and flood on the storage value of ₹1,25,000, vide policy no. 35/2026/7845, valid from 01/04/2026 up to 31/03/2027.

Balance in store **100 bags · 50 qtl**

Entries on this lot

Date & time	Entry	Reference	In	Out	Balance	Recorded by
21/11/2026 2:35 PM	Received	—	100 bags 50 qtl		100 bags 50 qtl	—

- Bring this receipt each time you take stock out. Staff will take it back and give you the new version.
- This receipt records stock only. Storage charges are billed separately.
- Non-negotiable: it names the party above and cannot be sold, endorsed or pledged to transfer the stock.

Terms

1. Any un-released balance of goods is subject to lien for unpaid charges and advances on the released portion.

Godown stamp

Authorised signatory

Party

Powered by Godaam

LT-26-3 · Version 1 · Page 1 of 1

Versions

Every change starts a new version with its date and time. Earlier versions stop being valid.

Duplicate copies are marked

Printing the same version again marks it DUPLICATE COPY. Every print is in the audit log.

Old copy taken back

At dispatch, staff take back the party's copy and give the new version. A copy that isn't returned is printed on the gate pass and logged.

Stamp and signature

Space for the godown stamp, the authorised signatory and the party. Non-negotiable and not transferable.

QR code

Scanning the receipt opens the lot on any staff phone.

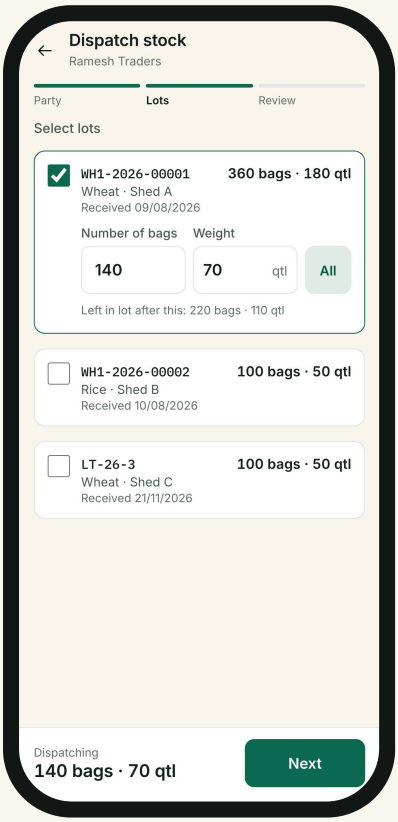

Rates, insurance and terms

The lot's rates, your insurance on the stock in store, and your terms, such as the lien on stock not taken out. Set for each godown.

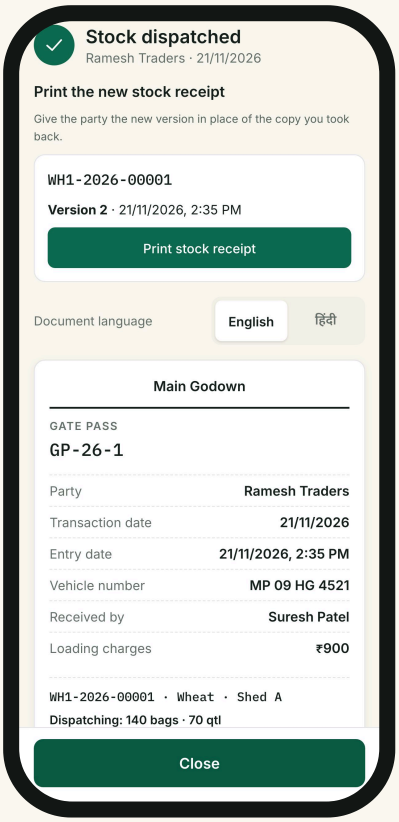

DISPATCH AND GATE PASS

A gate pass for every truck

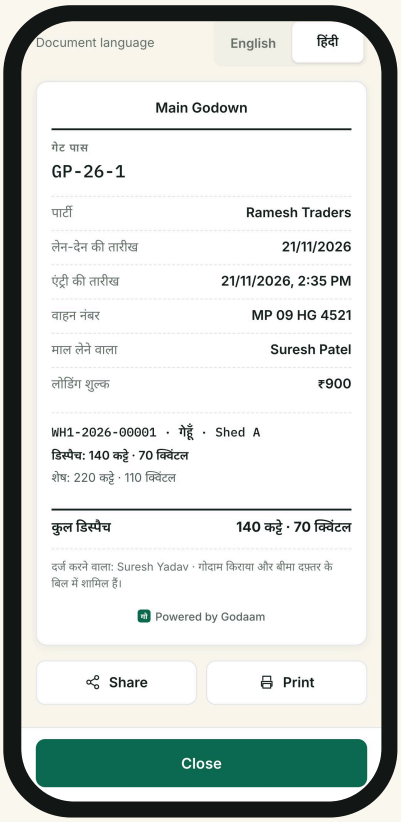

Take out a whole lot or part of one, from one lot or several. Godaam shows what will be left, then issues a numbered gate pass in English or Hindi.

Pick lots and how much; what's left shows straight away

Gate pass, plus a reminder to print the new receipt

The gate pass in Hindi

You approve staff dispatches

A dispatch recorded by godown staff gets its gate pass only after the owner or accountant approves it. Rejected stock goes back into the godown, and the staff see why.

Stock never goes below zero

If another phone took stock from the same lot first, Godaam stops and shows what is really left.

Vehicle and collector

The gate pass records the vehicle number, who collected the goods and the loading charges.

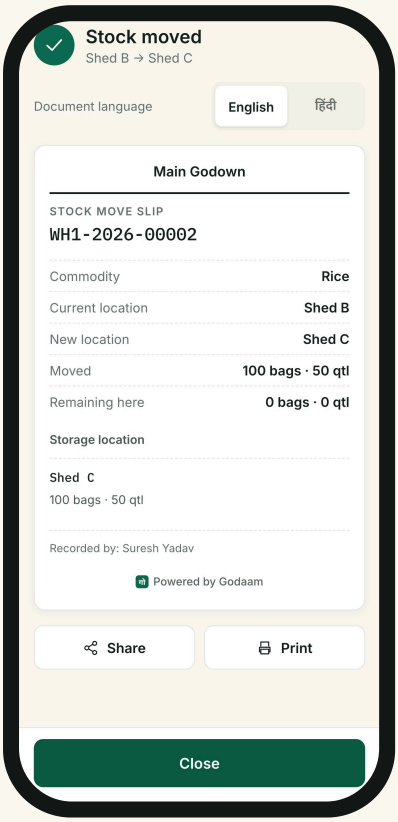

Rent is worked out at dispatch

Storage rent and insurance come from the party's rates, ready for the office to invoice.

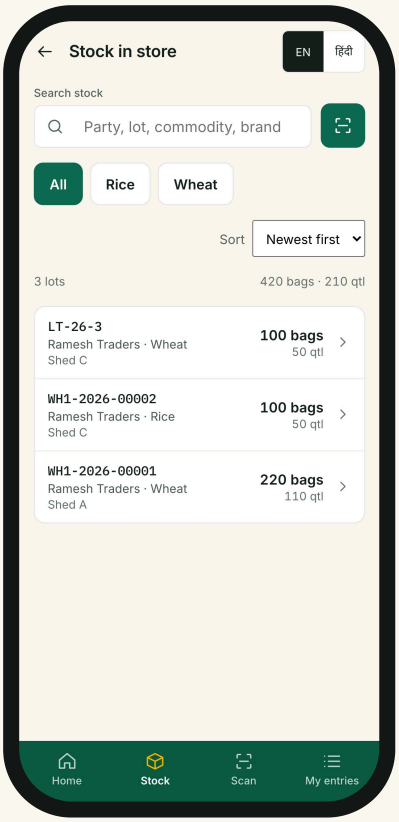

MOVE STOCK · FIND ANY LOT

Always know where every bag is

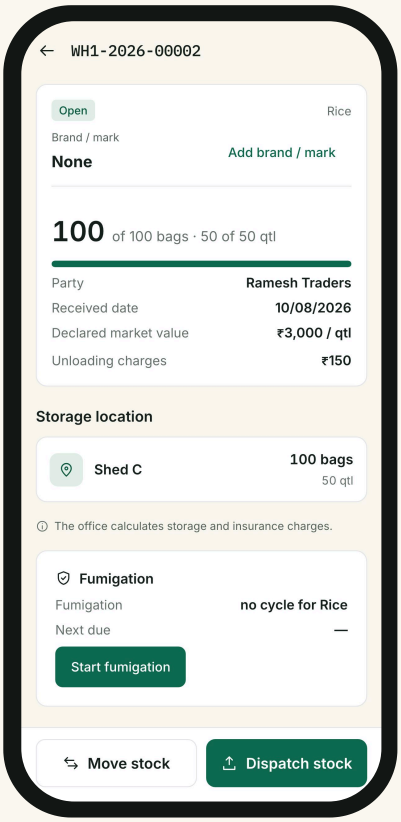

Move a lot to another shed or chamber in a few taps, and find any lot in seconds from the phone or the office.

Stock move slip:
from Shed A to Shed C

Stock by lot, shed
and commodity

Everything about one lot,
with Move and Dispatch

Search any way

Party, mobile, lot number, commodity, brand or mark, or the receipt number from your old books.

Scan the receipt

The phone camera reads the receipt's QR code and opens the lot.

Filters

By commodity and stock on hold. Entries shows everything received, dispatched or moved, today or in any period, with the party and the brand / mark.

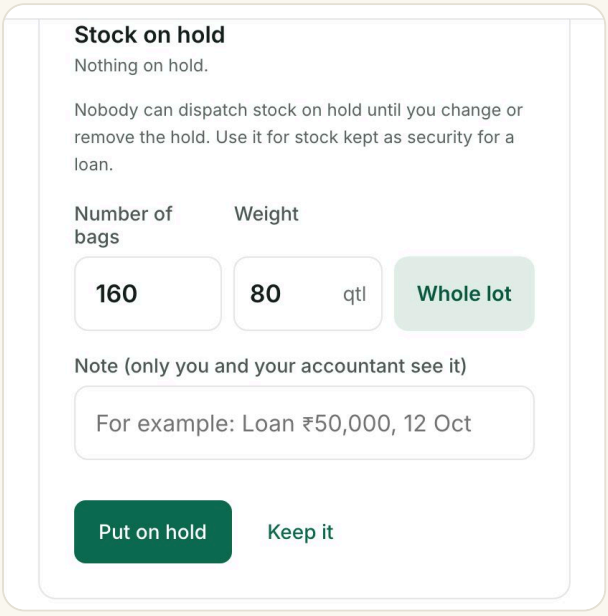

Space used

Set the godown's capacity once; Stock and the dashboard show how full it is.

STOCK ON HOLD · FIXING A WRONG ENTRY

Protect pledged stock, fix mistakes cleanly

When a party takes a loan against stock, the owner can hold part or all of the lot. And when an entry is wrong, the owner can cancel it without losing the record.

Stock on hold

Nobody can dispatch held stock

Hold the whole lot or part of it until you change or remove the hold.

Private note

For example "Loan ₹50,000, 12 Oct". Only the owner and the accountant see it.

Hold history and dashboard

Every hold change is kept, and the dashboard shows the weight and value on hold.

Fixing a wrong entry

Cancel and re-enter

The owner can cancel a lot's latest entry, then enter it again correctly or just cancel it.

Nothing disappears

The cancelled entry stays visible, struck through, with who cancelled it and why. A cancelled receipt prints with CANCELLED across it.

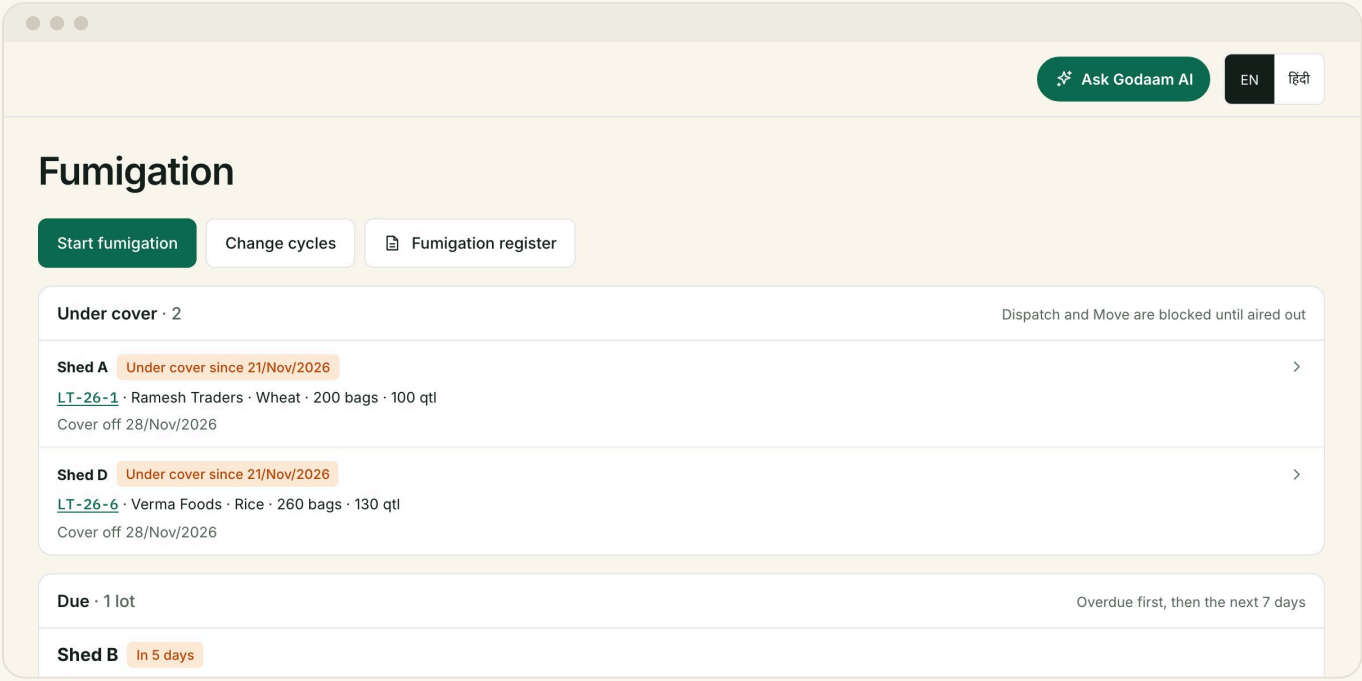

Lot statement

Every charge on one lot, from the day it came in.

FUMIGATION PLANNER

Fumigation on time, and on record

Set how often each commodity is fumigated, and Godaam works out when each lot is next due, from the day it came in. One page shows what is under cover, what is due this week and what is late.

Fumigation: under cover, due (late first) and coming up, one row for each stack or shed, with the lots in it

Asked at the gate

Receiving a commodity for the first time asks how often it is fumigated, in days, or No fumigation, so no lot is left out.

When it's due, worked out

The first fumigation falls one cycle after the lot came in, the next one cycle after it was aired out. Change a stack's date by hand, or skip one with a reason.

Reminders on the phone

Everyone on the account is reminded 3 days before, on the day, every 3 days while it is late, and when the cover can come off.

Under cover, the stock stays put

A cover goes over a stack, or a whole shed. The bags under it can't be dispatched or moved until they are aired out; the same lot's bags in another stack still can. Staff who want to end one early ask, with a reason, and the owner or accountant approves.

A register for inspectors

Date, chemical, exposure days, dose, operator and licence number for every fumigation, printable by godown and period.

In the history and the audit log

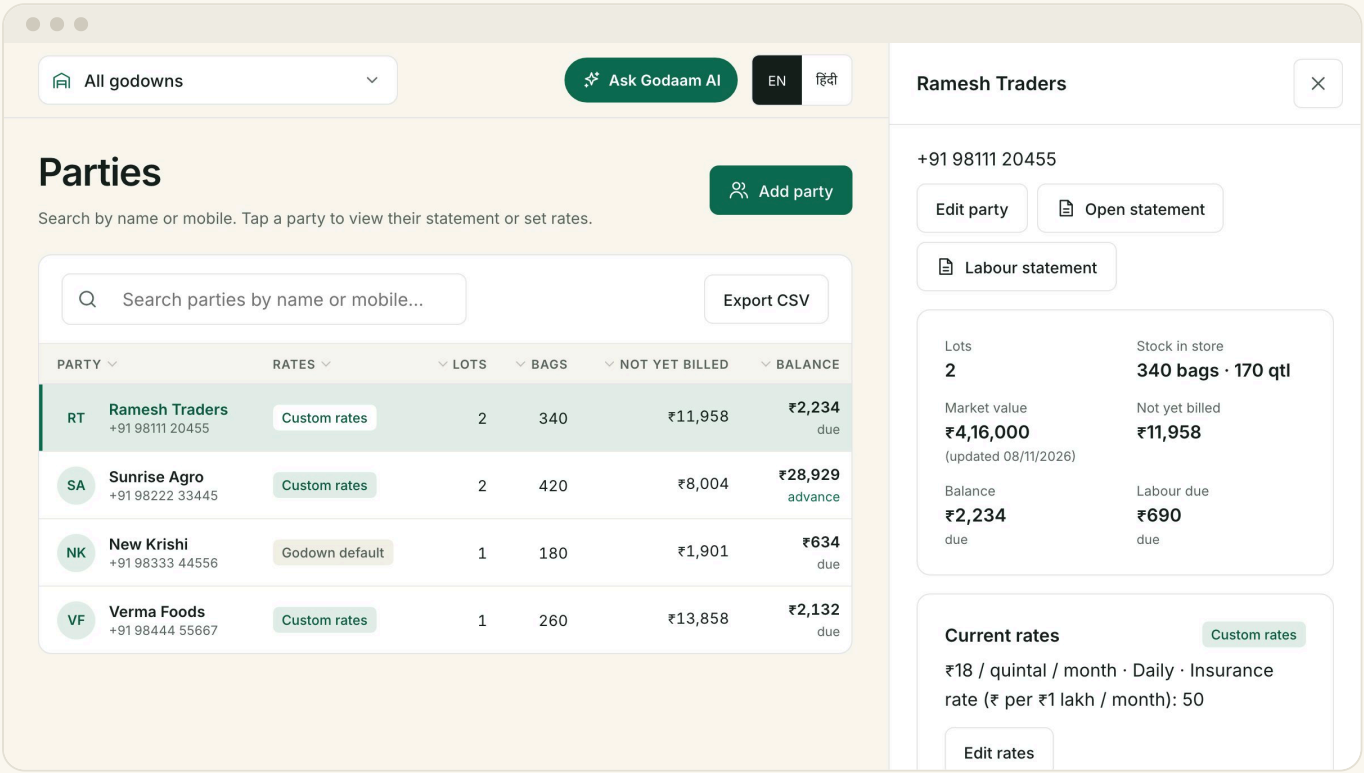

Every cycle, date, cover on and cover off is in each lot's history and the audit log, with who did it and when.

Part of the Team and Business plans. The owner's and the accountant's dashboards show what is late or due this week.

PARTIES AND RATES

Set rates once, bill correctly forever

The godown has default rates. Any party can have custom rates instead. A lot keeps the rates it came in at, and every change is recorded with who made it.

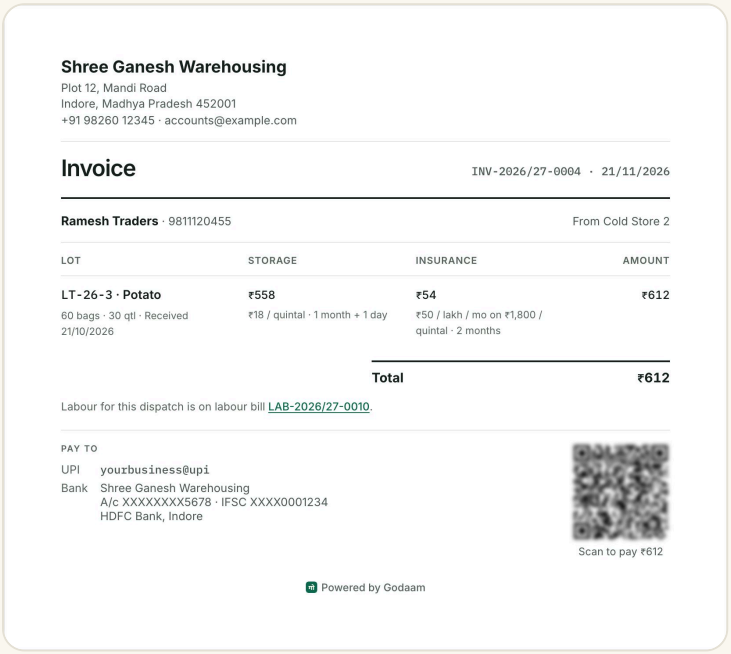

Parties: rates, lots, stock, charges not yet billed and balance, with each party's rate history

CHARGE	HOW IT'S SET	HOW IT'S WORKED OUT
Storage rent	₹ per quintal per month	The first month is charged in full. After that, choose **Daily** (each extra day is 1/30 of the rate), **Weekly** (each extra week is ¼) or **Monthly** (each month begun).
Insurance	₹ per ₹1 lakh of value per month	Charged on the declared market value of the lot. The owner can update market values at any time.
Loading and unloading	₹ per quintal, or a total	Entered at the gate when stock comes in or goes out.

INVOICES

Invoices that write themselves

Every dispatch gets its invoice by itself once its gate pass is issued, with the rent already worked out, on your letterhead, numbered by financial year.

Powered by Godaam

Payment details in this sample are hidden

Clear line items

Storage rent with the period and insurance, for each lot. Unloading and loading go on a labour bill of their own, paid separately.

UPI QR to pay

Your UPI ID and bank details, with a QR code for the amount still due.

Print, PDF or WhatsApp

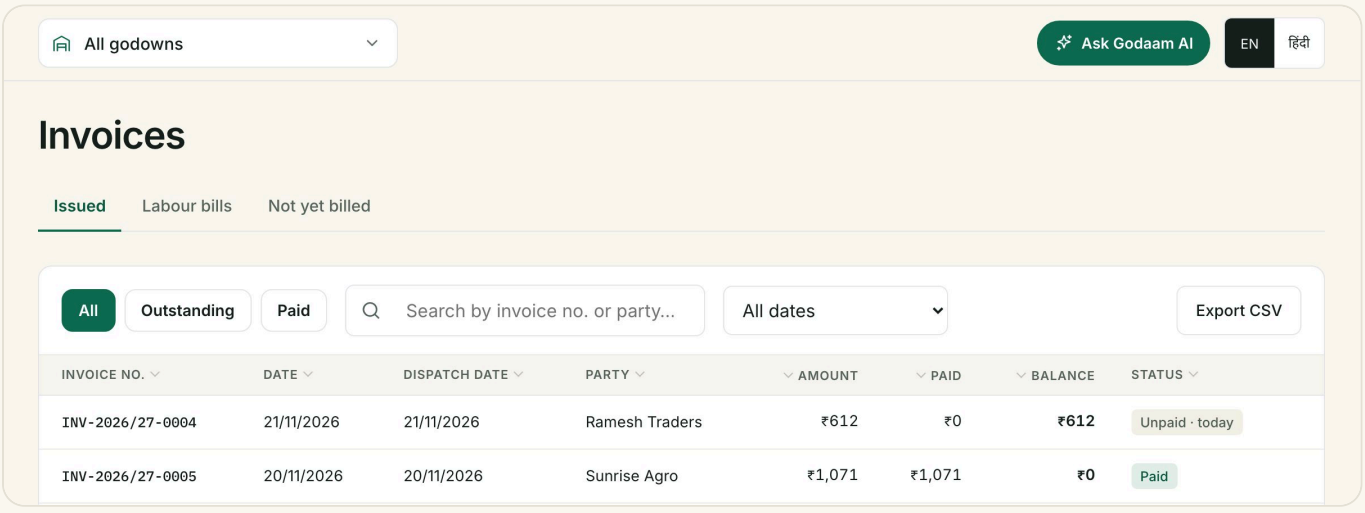

Print it, save it as a PDF, or send it to the party on WhatsApp, in English or Hindi.

Nothing forgotten

Dispatches waiting more than 3 days turn red, and the dashboard shows what's waiting.

Paid, part paid or unpaid

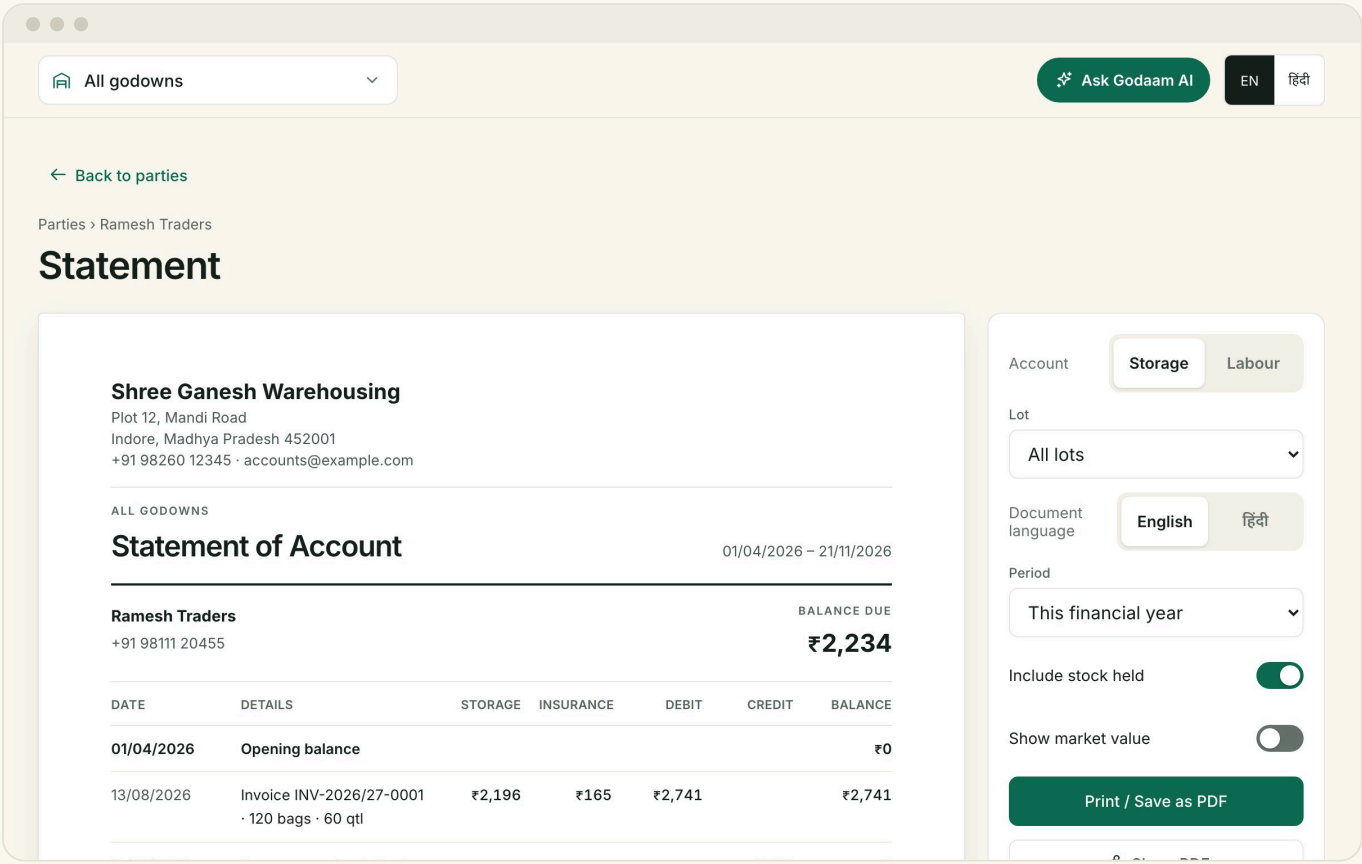

Each invoice shows its status and how long it has been unpaid. Issued invoices can't be edited.

PAYMENTS AND STATEMENTS

Know who owes what

Record a payment by cash, UPI, bank or cheque. Godaam shows which invoices it settles, oldest first, and keeps any extra as an advance.

Statement of account for any period, with opening and closing balance. Print it, save it as a PDF or WhatsApp it.

Party balances — Export CSV

PARTY	INVOICED	PAID	OUTSTANDING / ADVANCE	LABOUR DUE
Ramesh Traders	₹6,597	₹4,363	**₹2,234**	**₹690**
Sunrise Agro	₹1,071	₹30,000	**₹28,929** Advance / credit	**₹630**

Party balances

Invoiced, paid and outstanding, or the advance held, for every party.

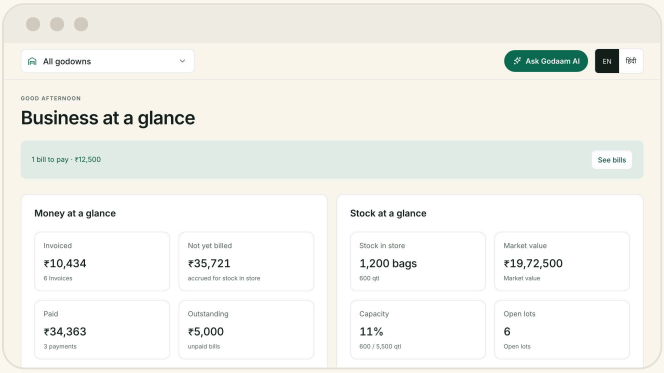

Parties don't need the app

Their statement shows their stock and balance.

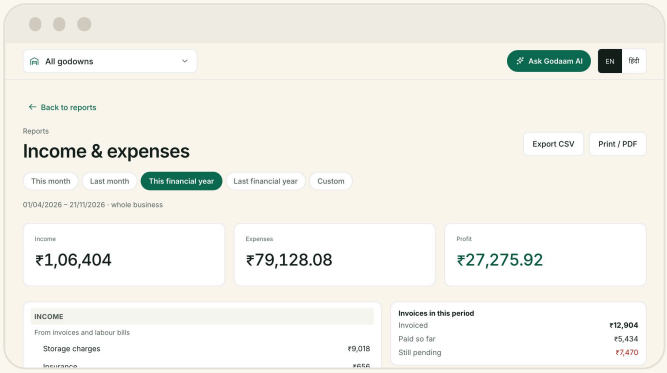

DASHBOARD, EXPENSES AND REPORTS

Your business at a glance

The owner's dashboard shows money and stock in one place: invoiced, not yet billed, paid and outstanding, stock in store, market value, space used and stock on hold.

The dashboard, with bills to pay

Income & expenses: profit or loss for any period

Expenses (Team and Business). Record insurance, salaries, fumigation, labour, electricity and repairs, by category and vendor. Unpaid bills wait in one list. Pay a month's salaries in one step. Spread a yearly cost over its months, and leave out GST you claim back. Bring in earlier expenses from an Excel sheet. Only you and co-owners can see them, never your accountant or staff. It is not a balance sheet.

Seven reports, each exportable to Excel (CSV)

Income & expenses

Income, expenses and profit or loss for any period, cash in and out, bills to pay, and month by month. Print or PDF in English or Hindi. Owner and co-owner only.

Income

Storage, insurance and handling invoiced, by month.

Outstanding and ageing

Unpaid balances by party: 0–30, 31–60, 61–90 and 90+ days.

Collections

Payments received, by mode and by party.

Charges not yet billed

Rent and insurance building up on stock still in store.

Stock summary

Quantity, bags and value by party or commodity.

Lot ageing

Lots in store by how long they've been stored.

Filter by period and party. The accountant gets a dashboard of their own: dispatches waiting for rates, overdue bills and the oldest unpaid ones.

Ask Godaam AI (Team and Business): tap a question, such as how much a party owes, what is in store or what fumigation is due, and the answer is worked out from your own records, with a button to the screen it comes from. No typing.

TEAM, DEVICES AND THE AUDIT LOG

You decide who sees what

Everyone joins from their own phone, tablet or computer, and nobody gets in until you approve the device and choose their role. Removing a device wipes Godaam's data from it.

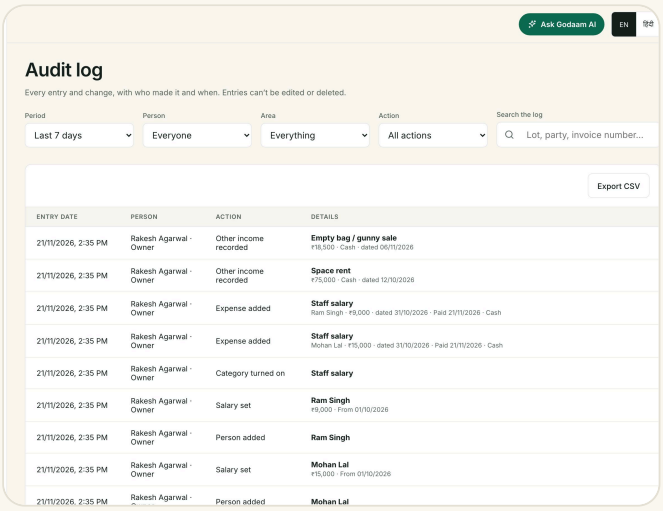

ROLE	WHAT THEY CAN DO
Owner	Everything: the godown, parties, rates, stock, billing, expenses, reports, holds, corrections, devices and the plan
Co-owner	The same as the owner, for a partner or family member
Accountant	Receive, dispatch and move stock; invoices, payments and other income, statements, rates, approvals and the audit log. Never expenses
Godown staff	Receive, dispatch and move stock, and print slips. They never see rates, invoices or balances

Simple joining

Share a QR code. The new device shows a 6-digit code that you check before approving.

Notifications

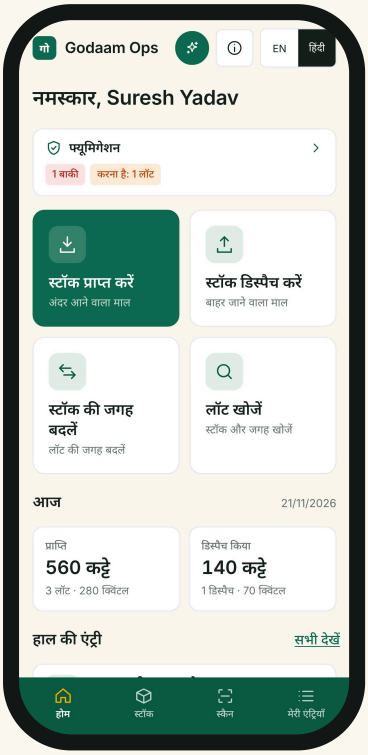

Stock in, stock out, dispatches to approve, payments, duplicate receipt prints and fumigations due, on your phone.

Audit log: every entry and change, with who made it and when. Entries can't be edited or deleted.

SECURITY · LANGUAGE · SETUP

Safe, in your language, and quick to start

The staff app in हिंदी

Encrypted business data

Your data is encrypted on your devices and on its way to the server.

Passcode, fingerprint and auto-lock

Each device opens with a passcode, or fingerprint or Face ID on phones. It locks itself after 5 minutes in the background on a phone, or 15 minutes unused on a computer.

Recover access

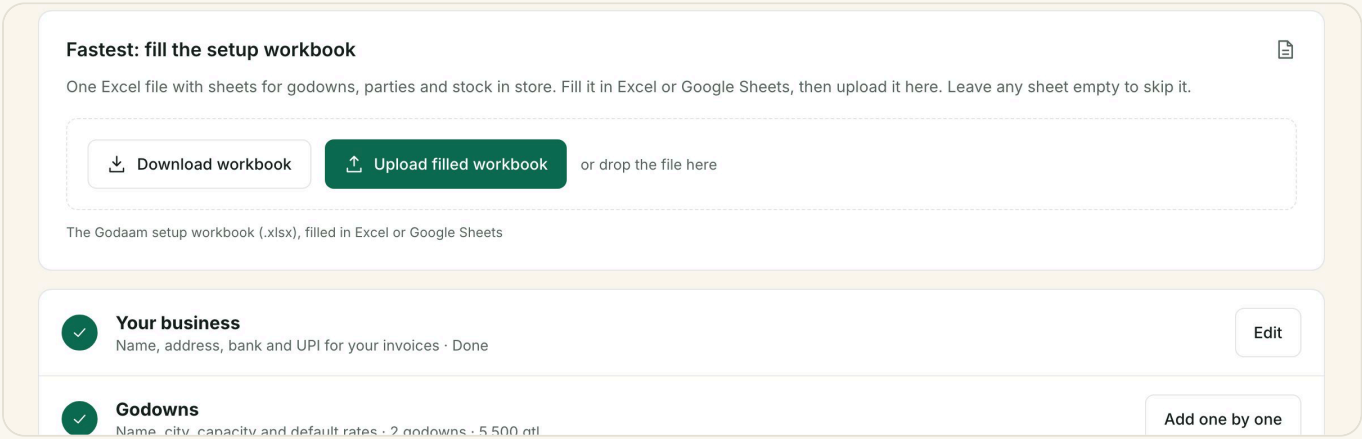

Lost phone or forgotten passcode? The owner gets back in with an OTP on their registered mobile.

English and हिंदी everywhere

Every screen switches language, and every document prints in either language. Help is built into the app in both.

Phones, tablets and computers

Android and iPhone for the godown. The owner and the office also work on an Android tablet or iPad, upright or sideways, or on the Windows app.

Up and running in one visit, free for 30 days

Fill one Excel workbook with your godown, parties and the stock in store today, upload it, and add your team. Ask us for a demo.
