गो Godaam

Run your godown from your phone.

Receive stock, issue gate passes, find any lot and bill your parties, all in one app. It's built for godowns and cold stores, in English and हिंदी.

- Staff app on Android and iPhone
- Office on a tablet or Windows computer
- English · हिंदी
- Rent worked out for you

RECEIVE STOCK

A new lot in three steps

At the gate, your staff pick the party, choose the commodity and enter bags and weight. Godaam gives the lot its own number and a printed stock receipt the party can keep.

1 **Pick the party**

Search by name or mobile, or tap a recent party.

2 **Enter the goods**

Usual commodity already selected. Bags, weight, value, charges, location and vehicle.

3 **Check and save**

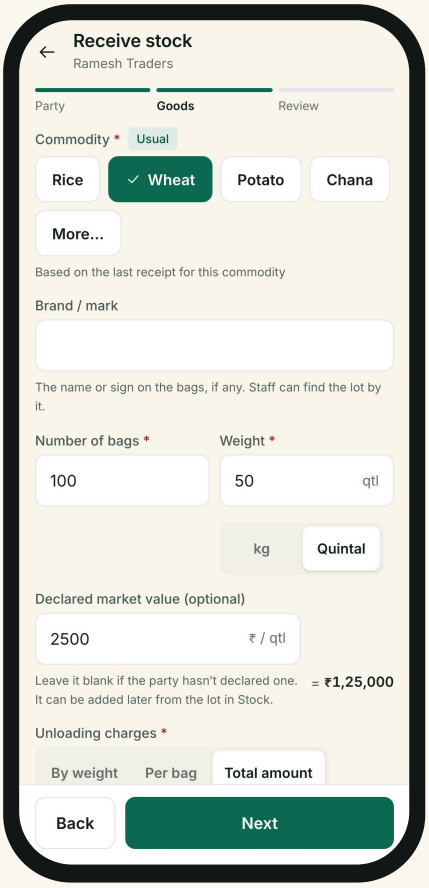

A review screen catches mistakes before anything is saved.

Printed stock receipt with a QR code

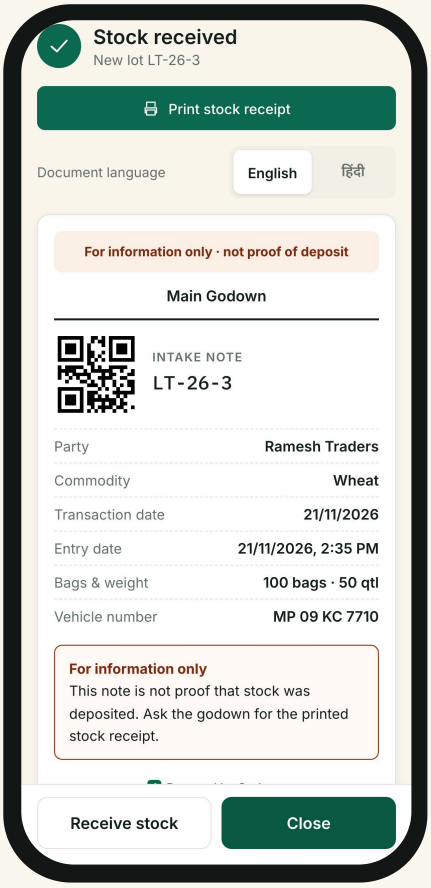

A numbered A4 receipt to stamp and sign, with the lot's rates, your insurance and your terms. Each change is a new version, and repeat prints are marked duplicate.

Intake note on WhatsApp

A quick note of what came in, in English or Hindi, marked for information only.

Goods: usual commodity already selected

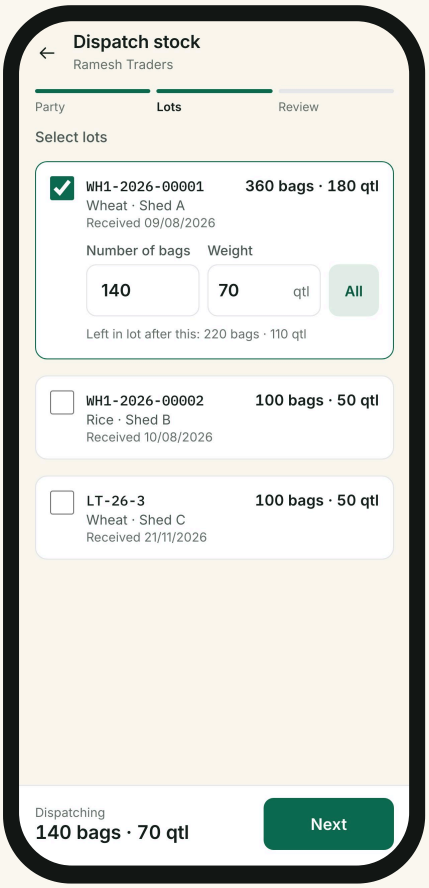

Saved: print the stock receipt or share the intake note

Every entry syncs to the owner's and the office's devices, so nobody has to phone the godown to ask what came in today.

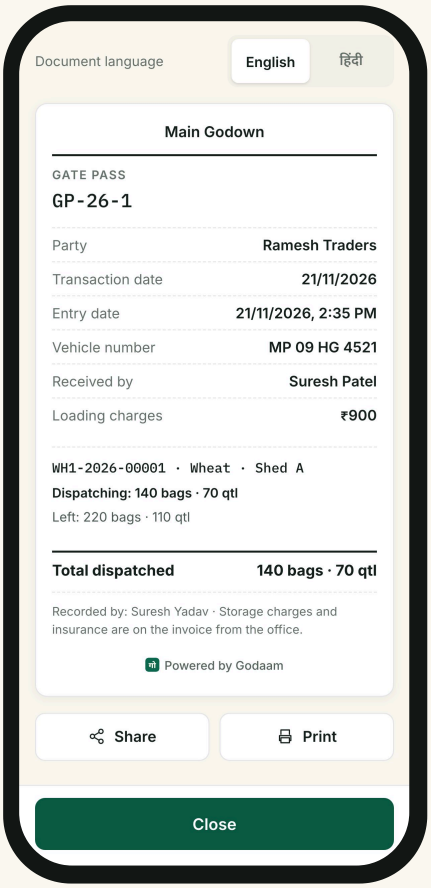

DISPATCH AND GATE PASS

A gate pass for every truck

Take out a whole lot or part of one, from one lot or several. Godaam shows what will be left before anything is saved, then issues a numbered gate pass.

Pick lots and how much to take; what's left shows straight away

Gate pass with vehicle number and who collected the goods

The same gate pass in Hindi, with one tap

You approve staff dispatches

When godown staff record a dispatch, the gate pass is issued only after the owner or accountant approves it. If it's rejected, the stock goes back into the godown and the staff see why.

Stock never goes below zero

If another phone took stock out of the same lot a moment earlier, Godaam stops the dispatch and shows what is really left.

Rent is worked out at dispatch

Storage rent and insurance come from that party's rates. The office invoices it, with no calculator needed.

Move stock inside the godown

Shifting a lot to another shed or chamber takes a few taps. A movement slip records where it went.

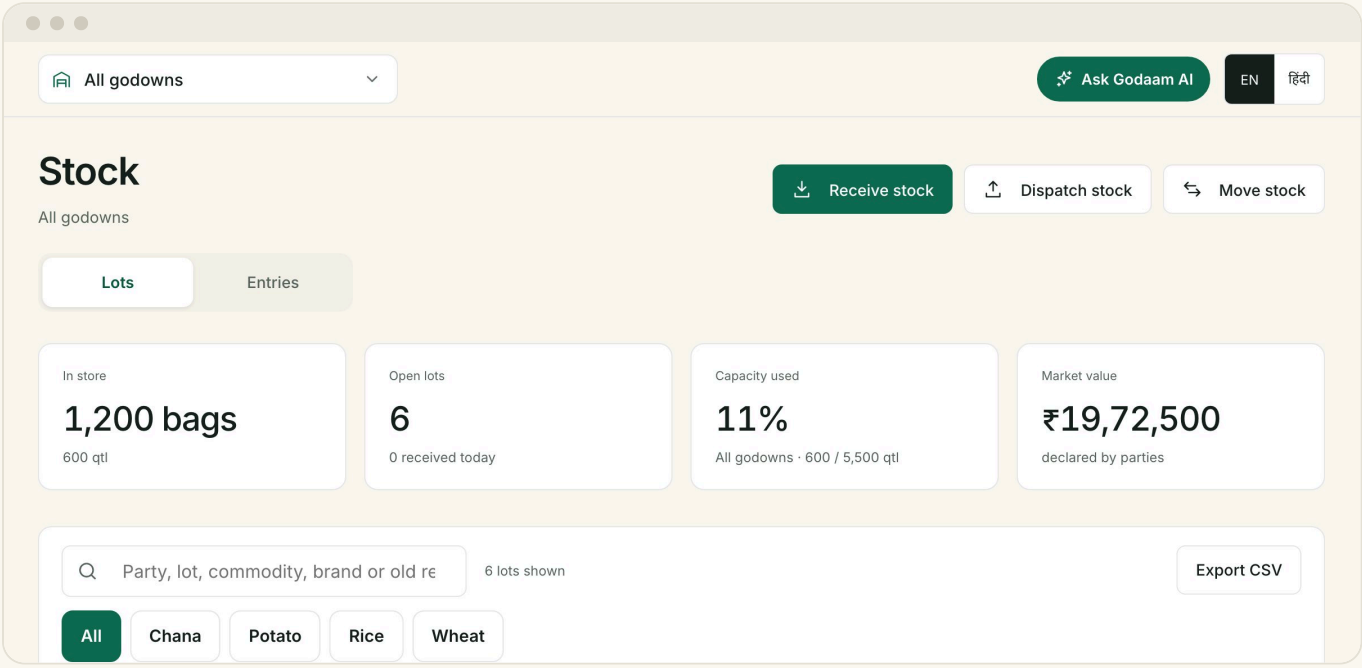

Scan the receipt

The party shows their stock receipt, and scanning its QR opens the right lot.

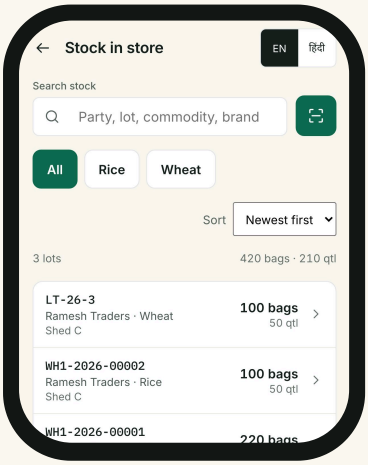

STOCK IN STORE

Find any lot in seconds

Search by party, lot number, commodity or even the receipt number from your old books. Staff see the stock on the phone, and the office sees it with value and charges to date.

Office and owner: all the stock, with market value and charges to date. Export to Excel (CSV).

Godown staff: stock by lot, shed and commodity

Lot numbers that make sense. Short and easy to say (LT-26-1, LT-26-2...), one count that never starts again, and every lot keeps its commodity, location, date received, bags and weight.

Stock on hold. If a party has pledged stock for a loan, the owner can hold part or all of a lot, so it can't be dispatched by mistake.

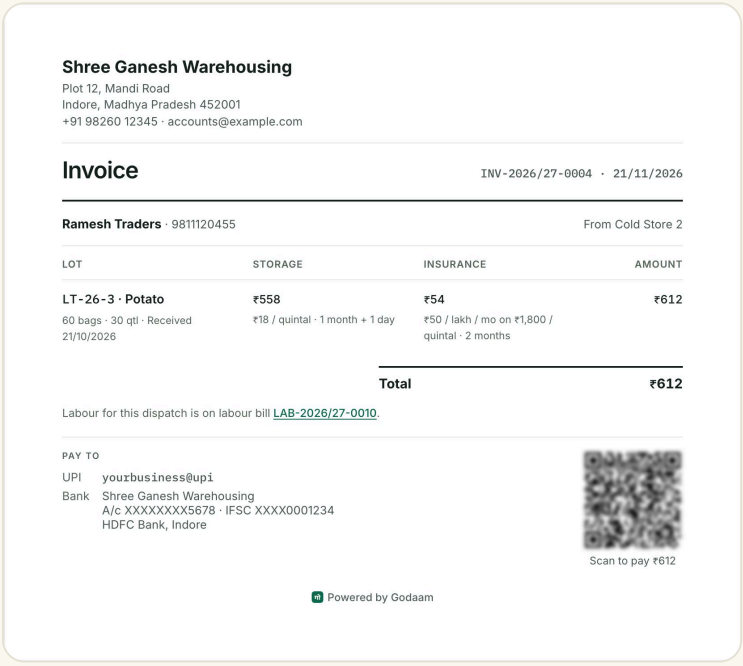

Entries. Everything received, dispatched or moved, from every phone, in one list: today's first, or any period, for one party.

Fumigation on time. When each lot is next due, reminders on the phone, and a register for inspectors. In Team and Business.

INVOICES AND PAYMENTS

Bill correctly, get paid faster

Each party's rates are set once: monthly, weekly or daily, plus insurance. Every dispatch then becomes an invoice on your letterhead, with a UPI QR code for the amount due.

(payment details in this sample are hidden)

Nothing missed

Every dispatch is invoiced by itself once its gate pass is issued. One waiting for rates shows on the dashboard until the rates are set.

Send on WhatsApp

Share the invoice as a PDF, or WhatsApp the party directly, in English or Hindi.

Payments and balances

Record cash, UPI, bank or cheque. Every party's balance and advance stays up to date, and statements are one click away.

Reports

Income by month, outstanding and ageing, collections, charges not yet billed, stock summary and lot ageing. Export any of them to Excel (CSV).

Party balances: what each party was invoiced, has paid, and still owes or has in advance

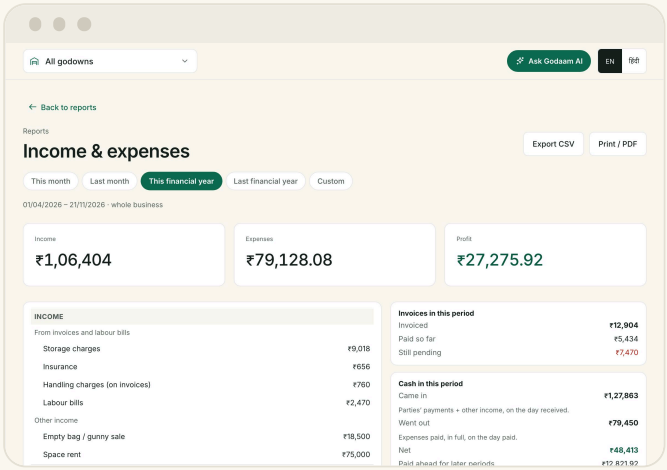

YOUR BUSINESS AT A GLANCE

Know where you stand, every day

One dashboard for money and stock: invoiced, paid, outstanding, stock in store, market value and space used.

The dashboard, with bills to pay

Income & expenses: profit or loss for any period

Expenses and profit. Record bills, staff salaries and other costs, see what is still to pay, and see your income, expenses and profit or loss for any period. Only you and co-owners can see them. In Team and Business.

WHO	WHAT THEY CAN DO
Owner	Everything, including approving each new phone, tablet or computer
Accountant	Stock entries, invoices, payments, rates and reports
Godown staff	Receive, dispatch and move stock. They never see rates or balances

Safe and private

Your data is encrypted on your own devices. Each device locks with a passcode or fingerprint.

Audit log

Every entry and change, with who made it and when. Entries can't be edited or deleted.

Up and running in one visit

We bring in your godown, parties and the stock in store today from one Excel workbook, then add your staff. Ask us for a demo.
